EDUCATION

Jaipur Engineering College And Research Centre, B.Tech in Information Technology | Rajasthan, India
GPA: 9 / 10.0

June 2024

1st place: Solving for India Hackathon by AMD, GeeksforGeeks, and Google Cloud (Institute Level Winner)
Tech volunteer: JECRC Cloud Summit 2022
College SDE society Enthusiast: 2021-2024

EXPERIENCE

Print Factory, Shopify Developer | Remote (Jaipur, India) 2020-2022, Nov 2023 - present

- Designed, developed, and maintained Shopify apps using the Shopify App Platform and API.
- Integrated third-party services and APIs into Shopify store.
- Developed custom themes and templates to create unique and visually appealing online store.
- Optimized app performance and ensure compatibility with different browsers and devices as well as troubleshooting.
- Integrated shopify store into shopify merchant app taking further to playstore using flutter.

DFCCIL, .Net Developer | On-Site (Delhi, India) Sept 2023 - Nov 2023

- Developed a secure login system using ASP.NET Identity, ensuring restricted access to employee data.
- Implemented role-based access control, enhancing security by providing different levels of access to HR administrators and employees.
- Designed an intuitive interface that streamlined employee registration and data management.
- Created a comprehensive dashboard that enabled HR administrators to efficiently manage employee records, reducing administrative time by 20
- Ensured data accuracy through robust validation mechanisms, minimizing input errors by 15

Compucom Software Limited, Full Stack Developer | On-Site (Jaipur, India) Jun 2022 - Aug 2022

- Led the development of a preference-based web application that recommended restaurants using Yelp's API, increasing user engagement by 25
- Engineered backend logic using Node.js and Express to process user preferences, delivering tailored restaurant recommendations
- Designed a user-centric interface with HTML, CSS, and JavaScript, improving the user experience and satisfaction.
- Collaborated with a team to implement features that aligned with user needs, demonstrating strong problem-solving and teamwork skills.

SKILLS

Languages	C/C++, HTML, CSS, JavaScript ,C Sharp, Python, Java, SQL,
Frameworks/Technologies	React.js, Angular, Node.js, Docker, Bootstrap, Git
Tools	Shopify, Linux, Cloud Platforms (Google and AWS), REST APIs, Android Studio, Flutter

PROJECTS

Mental Health Care App – Mental Health Tracker

- Developed a cross-platform mental health care app using Flutter, integrating features such as mood tracking, mindfulness exercises, and access to mental health resources.
- The app advanced to the regional level in the Google AMD Hackathon, showcasing strong problem-solving and user-centered design skills.
- Deployed the app on Android, ensuring a seamless and responsive user experience across devices.

AROMA – Food Delivery Application

- Built a preference-based food delivery web application using Node.js, Express, JavaScript, HTML, and CSS.
- Integrated Yelp's API to recommend restaurants based on user preferences, enhancing user satisfaction and engagement.
- Designed an intuitive and responsive front-end that adapted to various user inputs, improving overall usability.

PORT SCANNER TOOL – Cyber Security Tool

- Developed a port scanner using Python, enabling users to identify open ports on a target IP address or hostname.
- Utilized Python's socket module and IPy library for efficient handling of IP addresses and network connections.
- The tool increased the efficiency of cybersecurity audits by providing quick and accurate scans.

BOOK STORE WEB APPLICATION – *Bookstore Management Application*

- Created a comprehensive bookstore management app using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented secure user authentication and authorization, ensuring restricted access to critical features.
- Developed responsive front-end components and seamless navigation using React Router, improving the user experience.
